

FUZAIL BUKHARI

MERN Stack Developer | Software Engineering Student

Swabi, Pakistan | bukharifuzail58@gmail.com | 0349-2423177

PROFESSIONAL SUMMARY

Software Engineering undergraduate with hands-on experience building full-stack MERN applications, including real-time systems using Socket.io. Proven ability to independently design, build, and ship complete products — from a real-time bidding platform to a role-based healthcare portal and an AI-powered interview simulator. IBM-certified in JavaScript Backend Development, with a strong foundation in OOA/OOD, UML, and Agile software design. Comfortable working across the stack and picking up new tools quickly, with a track record of collaborating on client (Fiverr) and academic team projects.

KEY PROJECTS

BidVerse — Real-Time Auction & Bidding Platform

MERN, Socket.io

- Built a full-stack real-time auction platform enabling live bid updates, countdown timers, and instant outbid notifications using Socket.io and WebSockets.
- Designed the MongoDB schema and REST API architecture to handle concurrent bidding events with data consistency.
- Implemented real-time UI updates in React so users see bid changes and timers update live without page refresh.

E-Commerce Platform

MERN Stack

- Developed a full-featured e-commerce web application covering product catalog, cart, checkout, and order management.
- Designed UML class diagrams and an ER diagram to model the product, user, and order relationships before implementation.
- Built RESTful APIs for authentication, product management, and order processing, integrated with a responsive React frontend.

MediCore — Healthcare Management System

React, Vite, Tailwind CSS

- Built the frontend for a role-based healthcare portal supporting Doctor, Patient, and Admin dashboards.
- Diagnosed and resolved a persistent sidebar layout/CSS bug affecting cross-role navigation consistency.

EXPERIENCE

MERN Stack Developer Intern (Remote)

- Completed a remote internship building full-stack features with MongoDB, Express, React, and Node.js on a live e-commerce project.

ML Project: Fake vs. Real Job Detection

Team Project

- Built a Python classification model to detect fraudulent job postings; presented findings in a 10-slide technical presentation.

EDUCATION

BS Software Engineering

COMSATS University Islamabad, Abbottabad Campus

6th Semester (Expected Graduation: 2027) | Registration No: FA23-BSE-103

Relevant coursework: Object-Oriented Analysis & Design, Software Requirements Engineering, Machine Learning Fundamentals, Software Design Patterns, Database Systems.

CERTIFICATIONS

- IBM JavaScript Backend Developer — 13-course professional certification (IBM)
- Generative AI for UI/UX Design — Certification

TECHNICAL SKILLS

Languages & Core: JavaScript, TypeScript, HTML5, CSS3, Python

Frameworks & Libraries: React, Node.js, Express.js, Socket.io, Tailwind CSS, Framer Motion

Databases: MongoDB, MongoDB Atlas, Supabase

Tools & Practices: Git/GitHub, REST APIs, UML, Agile/Scrum, Unified Process, Vercel, Render, Jupyter Notebook
